## All Roads Lead to Irma for Big Sports Day, Wednesday, August 2nd

### First Legion Sports Day Is Very Successful Affair

**Irma Red Stars Beat Rockyford—Camp Lake and Coal Springs Game Disputed—Rosyth Girls Win Soft-ball Game—Other Sports Keenly Contested**

The first attempt of the Irma branch, No. 112, Canadian Legion, B.E.S.L., to put on a sports day was a decided success. The weather was beautiful and the crowd was even larger than many had anticipated. Although the ball games were a little late in starting due to the fact that the teams which were to play first were short-handed, and substitutes had to be looked for, everything was pulled off without a hitch.

The first event was a baseball game between the Irma Red Stars and Rockyford and was easily won by the Red Stars with a score of 13 to 4.

Next was a game of softball between the famous Rosyth girls and the Irma girls. This game was also very one-sided, mostly due to the fact

that the winners had played together for a number of years, having had plenty of practice, while the Irma team had only been organized this summer. The visitors got a big lead in the first inning after which the Irma girls steadied down and did much better.

Next on the list was a game of baseball between Camp Lake and Coal Springs. This game was not played to a finish as the captain of the Camp Lake team refused to accept the decision of the umpire on a certain play and called his men off the field.

At this time the foot races were started under the direction of the secretary, Comrade L. M. Roberts. These races, which included everyone from the little tots to the adults, proved to be very interesting and exciting.

The boxing exhibition in which a number of the local artists, including Curly Kid, Lefty Lukens, Geo. McBain, Jas. Kennedy, Shorty Prosser, Geo. Foreman and Albert Howard took part, next drew the attention of the crowd who enjoyed this event immensely. As soon as this was finished, the final baseball game between the Red Stars and Coal Springs, the winners of the first two games, was started, and held the close attention of the crowd until dusk. This game was more keenly contested than the first two and resulted in a win for the Red Stars by a score of 8 to 6. Mr. L. L. Guitner umpired the baseball games, while Clifford Smallwood handed out the decisions for the softball games.

The members of the Ladies' Auxiliary of the Legion are to be congratulated on their work of supplying the eats for the crowd. Although the membership is small, everyone worked hard until the finish and were well rewarded for their labors.

The refreshment booth was well looked after by Comrade N. S. Johnson, R. McFarland and C. R. Jackman, and a nice tidy sum was realized by this department. Comrades H. and E. W. Carter were posted at the gate and relieved the adults of 25 cents each which proved to be a popular admission. As soon as the program on the fair grounds was concluded the crowd proceeded down town to Kiefer's hall where dancing was indulged in until the early hours of the morning. The Coulman orchestra, as usual, supplied peppy music for the dance where again the receipts were very satisfactory.

Much credit is due the members of both the Ladies' Auxiliary and the Legion for the time and energy spent to make this event such a huge success, more particularly to the president and secretary, Comrades Jackman and Roberts, and also to Comrade C. McLean for his help with his truck.

The Legion plan to make this an annual event and here is hoping for a bigger and better celebration next year.

### Last Chance For Real Good Time Before Harvest Time

THE BIG ATTRACTION for everybody for miles around will be the sports day at Irma, on Wednesday, August 2nd, sponsored by the Irma Hockey Club. All those interested in promoting hockey in Irma should turn out in large numbers and urge their friends to do the same. Ladies would do a good turn if they would donate pies to the booth, or anything else in that line that the booth needs.

Keen interest is being manifested in the baseball tournament in which six teams will try to cop the coin. There will be all kinds of races for the kiddies, half mile race, 100 yard dash, greasy pigs and slippery porkers; horseshoe tournament and other events that the committee is arranging. This is your last chance before harvest to come and enjoy summer sports that will promote winter sports. A dance in Kiefer's hall at night should set off a real day in July.

See Jack Fletcher about any details in regard to the sports.

#### HOW TO GAIN WEIGHT

Well nourished bodies are the foundation of good health. Overweight is a danger to health. Slenderness is fashionable, but slenderness may reach a degree of thinness which is as unhealthy as is overweight.

There are tables which give the average weights for the individuals according to age, sex and height. No particular person is an average person, and so the tables are merely guides. The best weight for each individual is the weight at which he enjoys the greatest amount of health. In most cases, the optimum weight is not far from the average. A person who is definitely above or below the average would find it worth while to consider the cause.

To get thin implies less food than the body uses. To gain weight, more food should be eaten than the body needs. This applies particularly to the use of such energy foods as potatoes, bread and butter, cereals, fats, meats, cream and oils. Any excess of food taken is stored away by the body in the form of fat, and so the body is filled out.

This does not mean that weight is to be gained by stuffing the body with food. To attempt to do so would only cause digestive upsets, and the purpose would be defeated. All the additional food required might be secured by taking a mid-morning or

mid-afternoon lunch, or by having something to eat before going to bed. An extra helping of butter at each meal and more generous use of oil dressings on salads will make a real difference.

The diet must be selected so that it will be balanced. Underweight may be due to insufficient food, but it is much more likely to result from a lack of the proper foods. Meals should be taken at regular hours and the food served in an attractive manner.

Thin people are often overfatigued. When the body is unduly tired digestion is interfered with. In such cases, a rest before meals is indicated. Weight will not be gained unless sufficient rest is secured. The person who is underweight requires extra hours in bed and a rest at noon.

Fresh air, sunshine, moderate exercise and the outdoor life are essential in the process of gaining weight. A new routine of life must be established, and this frequently includes a different attitude which will release from tenseness and overactivity which are so commonly experienced by those who are underweight.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

### Review of Western Markets

**Cattle**  
BEEF—Offerings more liberal at Edmonton, with quite a few grassers showing up. Dry fed good sellers but grassers still draggy. Choice heavy steers \$3.75@4.25; choice light \$4@4.50; good \$3.50@3.75; medium \$3@3.50; common \$2@2.50. Choice heifers \$4@4.25; good \$3.50@3.75. Choice cows brought \$2.25@2.50; good \$2@2.25; medium \$1.75@2; common \$1.25@1.50; canners and cutters 50c@\$. Choice bulls \$1.25@1.50; medium \$1.125; canners from 75c up. Choice light calves \$3@3.50; common \$2@2.50. FEEDERS-STOCKERS—Offerings on plain order and market not active. Feeder steers \$2@3; stock steers \$2@3; stock heifers \$2@3; stock cows \$1.25@1.75.

**Hogs**  
Edmonton market also easier. Bacon bringing \$5.25@5.30; select \$5.75@5.80 and butchers \$4.75@4.80, fed and watered basis.

**Sheep**  
Edmonton market shows lambs easier. Yearlings bringing \$2@3; ewes \$1@2; lambs \$3@4.50.

**Poultry—Eggs**  
POULTRY—Receipts falling off, quality fair. Some fowl very thin,

while a few broilers could carry more weight. Demand from hotels and restaurants fair; butcher shops limited buyers. Some movement through summer resorts. Prices unchanged to slightly easier: Fowl, No. 1, over 4 lbs., 6@8c; No. 1, under 4 lbs., 5@6c; No. 2, 3@4c; roosters 3@4c. Chicken, No. 1, 10@12c; No. 2, 9@10c. EGGS—Quotations advanced 1c on Monday. Extras, 12c; firsts, 9c, and seconds 6@7c. Receipts light; quality not high. Demand keeping market cleaned up. Some direct selling.

**Hay—Feed Oats—Greenfeed**  
HAY—No demand for carload lots. Little movement from country; prices steady: Upland \$7; timothy \$7@8, loaded on cars at shipping point. Calgary loose hay market finds good demand, with supplies light. New crop being cut, but yield may be light. Prices unchanged: Upland, baled, \$9; loose, \$8 per ton, delivered. FEED OATS—quotations advanced 13c this week at 31@33c per bushel. Better demand reported, with supplies only arriving as required. GREENFEED—Offerings light as supplies decline. Yield expected to be small this fall. Price steady at \$5@5.50 per ton, delivered.

### Many Attend Funeral of Late Mrs. Wm. Walker

**Interment Took Place, Thursday, July 20th, in the Irma Cemetery—Rev. J. R. Geeson Officiated—Many Floral Tributes**

On Tuesday, July 18th, occurred the death of Mrs. Wm. Walker, a well-known resident of the Irma district. The deceased had been suffering for the past few months with cancer, part of which time she had spent in the Royal Alexandra hospital, Edmonton, receiving special treatment in the hopes of recovering her health. A short time ago, however, it was realized nothing more could be done for her so she was brought back to her home where she gradually became worse, passing away in the afternoon of the 18th inst.

The funeral service, which was well attended, was held in the Irma United church on Thursday, July 20th at 2 p.m., and conducted by Rev. J. R. Geeson, pastor of the church, who spoke very comforting to the bereaved.

The floral tributes which covered the casket were very beautiful and were contributed as follows: Pillow from the family, sprays from Mr. and Mrs. W. A. Burton, Roseberry Good Times Club, Mr. and Mrs. W. N. Frickelton, Mrs. J. Smart, Mr. and Mrs. N. S. Johnson, the Peterson family, Mr. and Mrs. G. N. C. Higginson, Mr. and Mrs. F. W. Higginson, Mr. and Mrs. W. M. Anderson, Mr. and Mrs. Geo. Batchelor, Mr. and Mrs. J. Fletcher.

After the service in the church, the remains were conveyed to the Irma cemetery where the last sad rites were performed.

The pall bearers, who were all neighbors of the deceased, were the Messrs. W. A. Burton, Chas. Younger, Chas. Savard, Wm. Anderson,

#### Dr. Greenberg Gives Interesting Hygiene Talk

Dr. Greenberg's talk on sex hygiene at Avonlea school was very well attended, some sixty people being present. A great deal of education on this subject was given and the committee and local thank Dr. Greenberg for his kindness in presenting the people of the community with a talk along this line. The ladies served a delicious lunch of sandwiches, cake, coffee and lemonade after the meeting. The next meeting will be at the home of Mrs. Cesar on August 17th.

#### FOR QUICK SALE

6 cows and heifers, due to freshen between now and December. Cheap for cash. All young stock—\$150 for the six.  
1 work horse, 9 years old—\$40 cash.  
1 Marconi, 7-tube 1932 model Radio, complete with tubes and batteries—\$75.00 cash.  
2 Inland Linoleum Rugs, 9x12—\$10.00 each.  
1 Chesterfield Suite, 3-piece—\$50.00.  
1 10-ft. double action DSS Harrow, John Deere—\$110.00 cash.  
1 22-in. John Deere Brush Breaker—135.00 cash.

JARROW ALBERTA 28-4c

#### A CHEERFUL WORLD

If we noticed little pleasures  
As we notice little pains;  
If we quite forgot our losses  
And remembered all our gains;  
If we looked for people's virtues,  
And their faults refused to see,  
What a comfortable, happy,  
Cheerful place this world would be!

B. T. Odham, and Hugh Adams. Mrs. (Walker would have been 46 years of age had she lived another month.) Besides her husband, she leaves to mourn: a family of three daughters and three sons, Mrs. Jean Steele, Annie, Margaret, Murray, William and James, who is only six years of age; and also one sister in Scotland, and one brother in New Zealand. Mrs. Walker's mother predeceased her last March.

The deceased came to Canada from Uddington, Scotland, in 1911, and settled in the Irma district in 1917, where the family have lived ever since. Mrs. Walker will be greatly missed not only by her family, but by everyone in the community, as she always took an active part in all social and religious affairs. The sympathy of the entire district goes out to those bereaved.

#### KINSELLA KERNELS

Kinsella, July 25.—Mr. and Mrs. J. Neale left on Saturday afternoon's train for a month's holiday which they expect to spend at Vancouver and Victoria. Mr. Harvey Dilburne, of Vegreville, has charge of the creamery here while Mr. Neale is away.

Mrs. Robt. Cormack entertained the Quinte Ladies' Aid last Thursday. There was a very good attendance, and a pleasant social time was had. Miss Belle Arkinstall, of Edmonton, is spending her holidays with her parents here.

Mr. and Mrs. N. S. Neace and family have been visiting friends in Edmonton.

Mrs. Birch, of Sedgwick, is visiting her parents, Mr. and Mrs. Arkinstall. Mr. Robt. Cormack, Mr. and Mrs. Bert Cormack were in Edmonton last week. Miss Ella Cormack returned with them.

Mr. E. C. Williams and daughter, Violet, Mr. Frank Williams and his mother, Mrs. M. Williams, motored to Edmonton on Sunday, returning Monday evening.

Mr. and Mrs. Jack Elliot and family of Edmonton spent the week end with friends here.

Mrs. William McKie and daughters Isabel, Jeanette and Chrissie, and Mr. Fred Beschell and Miss Elizabeth Beschell motored to Seba Beach on Saturday to attend the wedding of Miss Nida Larul and Mr. John Beschell on Sunday, July 23rd.

Mr. and Mrs. Callis, of Wainwright returned home on Saturday after spending the past week with Mr. and Mrs. Johnson.

Mr. and Mrs. William Anderson of Clark Manor spent Saturday afternoon with Mr. and Mrs. R. L. Eaton and Mr. and Mrs. E. C. Williams. Mr. Frank Williams, Mrs. W. Williams, Mrs. Ross Cormack, Mr. Tom Cormack, Mrs. Johnson and son Tom motored to Wainwright on Tuesday evening last to hear Mr. Abelheart.

A few from here attended the sports at Irma on Friday last.

#### Women's Institute— Special Notice

Owing to the Irma Sports Day being held on August 2nd, the Women's Institute will be held on August 10th at Mrs. Garfield Coulman's. Ladies kindly take notice of the change in date.

MRS. R. C. McFARLAND, Secretary.

### A Dog With A Bad Name.

Alignment of the various countries participating in the World Economic Conference at London, England, into a Gold Bloc on the one side, and a Sterling-Dollar group on the other, served to rivet attention of the world on the difficulties attending a conference of the kind. There is no gainsaying the fact that the people of all countries participating are anxious to see the conference reach some definite, if not spectacular, conclusions, but, despite this unanimity of desire for adjustment of the economic machine, the burning hunger of all peoples to end depression and restore world trade and world purchasing power, memories of old crises hedge the inflationist suggestions with almost insuperable obstacles. It is a case of the dog with a bad name.

Countries of Europe, which with France and Germany adhere to gold, have painful recollections of their ventures into the realm of uncontrolled inflation. They remember the disastrous sky-rocketing of commodity values in relation to monetary units. They recall the hectic efforts to keep abreast of currency depreciation, and the desperate calculations, involving reckoning in astronomical figures, which maintenance of an ordinary family budget entailed. Inflation to them means printing presses working overtime, and the catastrophic uncertainty of day-to-day business. No wonder then that they hesitate to venture again from the gold anchorage.

Great Britain, the Dominions, the United States, and adherents of the Sterling-Dollar group, have not the same grim experience of frenzied reckoning. Britain hazarded a return to gold, and bled herself white in the process of maintaining the standard: So much so that when the country eventually was forced off gold, it was with something of relief that the country abandoned its heroic efforts to maintain the pound at gold par, and allowed it to find its own level on world exchanges. The United States, having embarked on a policy designed to raise commodity price levels and revive moribund industry, has found it to release the dollar from gold, and is not to be persuaded to hitch it to any other monetary standard until experience has demonstrated the proper level at which it should be pegged for the country's good. The assurance the world now awaits is whether or not the United States will be able to control the inflationary process upon which it is launched.

London news would indicate that, whereas Britain abandoned the gold standard and apparently was allowing sterling to find its own level, in reality the pound, for some time, at least, has been maintained in a position of some relationship with the French franc. Some measure of control, therefore, has been exercised in Britain and, in the result, there has been no appreciable disequilibrium between money wages and commodity values. The possibility is that the United States will pursue a similar course. That is to say, the dollar will be permitted to find a level at which the beneficial effects of the inflation are real and, this position having been reached, a strenuous effort will be made to prevent the inflationary trend from going far enough to negative the good done.

The controversy between the members of the Gold Bloc and those adhering to the Sterling-Dollar group has the effect of forcing Great Britain to declare its inclination. It is noteworthy that, in the test, Britain threw in her lot with the Dominions and the United States, which would appear to indicate that Britain is looking toward these countries rather than to the continent of Europe for the trade opportunities essential to her economic wellbeing. London dispatches have made it abundantly manifest that the British people are becoming more wedded to the idea of an Empire Economic unit, to the extent that such an idea is tenable. Indeed, at one crisis in affairs of the conference, when definite attempts were made to force its adjournment, there were many proponents of a scheme to organize a second Empire Conference from among the representatives of the British dominions now gathered in London.

The obvious deduction to be made from the propagation of such ideas is that, whatever the outcome of the World Conference, the trade relationships as between the Mother Country and the Dominions overseas are bound to be improved. Contacts established have proved fruitful. British opinion is emphatic for practical application of the Ottawa agreements and for their extension. Canada should not hesitate to capitalize this favorable attitude, and, with prices of the primary products moving upwards, the stage is being set for a real revival.

### Costs Little To Operate

Small Airplane Weighs Less Than Thousand Pounds Loaded

One of the smallest airplanes built, a two-cylinder Aerona, is proving its wings in high altitude flying at the Western Airport at Denver, Colo., more than a mile above sea level. The plane weighs less than 1,000 pounds loaded, and can be operated for less than \$2 an hour, its owners say. It develops a maximum speed of ninety-five miles an hour and maintains a cruising speed of eighty-five miles per hour. It burns only two and a half gallons of gasoline an hour. The craft is a two-seater cabin monoplane.

### Would Be Some Crow.

No one in the farm district community of Shenandoah, Iowa, is unfamiliar with a rooster's crow at dawn, but it was not until recently that any of them had heard 11,000 roosters crow at once. Placed in cars for shipment to market, one of the chanteclers raised its voice to greet the day and most of the other 11,000 joined in with him. The din brought many startled residents out of bed.

## Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized, at any time, with diarrhea, dysentery, summer complaint, or other forms of bowel trouble. There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry; a remedy that has received the endorsement of legions of Canadian mothers during the 86 years it has been on the market. Don't experiment. Get "Dr. Fowler's" and be on the safe side. Manufactured only by The T. Milburn Co., Ltd., Toronto, Ont.

### A Martyr To Science

Doctor Pierced His Body To Test Pain Sensations

How a doctor suffered self-inflicted pain by piercing himself to the bone with a sharp needle was revealed at the James Mackenzie Institute for Clinical Research at St. Andrews, Scotland.

This martyr to science, Dr. David Waterston, narrated to the Institute how he decided to make experiments on himself, as it was vitally essential to have training in the analysis of sensations. His experiments were to discover to what extent pain was felt when different parts of the bodily tissues were irritated from outside.

Dr. Waterston pierced himself with a sharp needle until he reached the bone. He made observations as he reached muscle, veins and arteries, to discover the extent of the pain he felt.

At one point, when he had penetrated an artery in his arm, the pain was so acute and sickening that he almost fainted. Undaunted, he continued his experiments.

Dr. Waterston's conclusions bring a new theory for the solution of the problem which has perplexed mankind since the world began.

Former theories stated that pain was due to over-stimulation of the nerves, which existed for the purpose of sensing touch. Dr. Waterston claims that there is an entirely distinct branch of the nerve system which exists solely for the purpose of perceiving pain.

These nerves do not reach to the surface of the skin. A needle can be passed through the epidermis and "touch-nerves" merely convey the sensation that something is in contact with the skin.

Further insertion of the needle at once produces a feeling of pain.

### The "Island Of Fright"

Noted For Thrilling Stories Of Shipwrecks and Rescues On Brittany Coast

A rocky island off the Brittany Coast where rock roads lead to villages with houses of stone was vividly pictured to a Montreal audience by Marie La Franc, noted French authoress. She described the boat trip from Brest to the island and told of the landing place, a perpendicular ledge inset in the solid rock. On the shore, she said, women wait for the boat, standing motionless like silhouettes of stone. Many vertical rocks and many lighthouses mark the shoreline, and inland stretch monotonous miles of grassy rock with thousands of sheep graze. Blue window frames of the houses lend the sole relief to the gray of the rock and the green of the grass.

Originally the island was named the Island of Fright because of the continual overhanging mists, she believed, and also because of the fact the impenetrable rocks formed a safe hideaway for pirates. Tales of piracy belong to another day and the island is now noted for thrilling stories of shipwrecks and daring rescues by the Ushant folk.

The womenfolk with their wild, wind-tossed hair she described as proud and upright. The menfolk are strong and simple seamen who visit many a French and foreign port but always marry a "Quessantine."

### Great Authority On Crime

Sir Erley Blackwell Retires After Long Service As Adviser

Sir Erley Blackwell, prison reformer and police authority has retired from his position as legal assistant under-secretary to the Home Office, he having reached the age limit of 65 years.

It is said that no man in the United Kingdom is possessed of a greater insight into the mind of the criminal or has so extensive a knowledge of the methods of the criminal fraternity than Sir Erley. Despite a stern demeanor, he has been a genuine friend to the criminal trying to make good, but to the hardened criminal who makes his living by crime he has proved a positive terror.

He has spent many anxious hours at the Home Office reading and considering petitions from convicted murderers and other criminals, for it was his duty to advise the home secretary on points arising on these matters. Every petition for many years past has gone through his hands. Born at St. Andrews in 1863, he was called to the Bar at the Inner Temple in 1892. He became assistant under-secretary to the Home Office in 1913.

In the last two years 403 women have been appointed magistrates in London.

Many a bachelor gives up good quarters to get a better half.

**BABY'S OWN SOAP**  
It's Best for You and Baby too

### Grain Elevators Busy

Rise in Wheat Prices Brings Changed Conditions

Saskatchewan wheat elevators are working night and day and there is a much happier situation there than has prevailed for a long time. Hon. Robert Weir, Minister of Agriculture, stated on his return to Ottawa. Mr. Weir has been for several weeks on a visit to his constituency of Moffat, Sask., and also visited much of the surrounding country.

The minister said there was much more wheat in the hands of the farmers than has been realized and they are now disposing of it at 60 cents a bushel and more, with the result that conditions have taken on a brighter aspect. The activity of Saskatchewan elevators was without precedent, Mr. Weir said. Some 50 municipalities had been badly stricken by the grasshopper plague, Mr. Weir said, and assistance would have to be given them.

### Use Russian Lumber

Britain Reported To Be Importing Large Quantities This Season

The Morning Post states Timber Distributors, Limited, a group of British importers, announced in a letter to British firms interested in purchasing timber that they would import 693,000,000 board feet of Russian lumber during the coming navigation season.

The newspaper said Timber Distributors, whose previous plans to import Russian wood were stepped by declaration of the recently lifted embargo against Russian goods, told its clients it was adding 15 shillings to the contract price for the lumber to cover inconvenience caused by the embargo.

Even with this addition, the Post quoted the firm as saying, the price in the British market would be far below anything with which Canadian timber interests could compete.

### Completes Cross-Canada Flight

Secretary Of Clubs Finds More Flying Being Done In Cities

George M. Ross, secretary of the Canadian Flying Clubs Association, landed at Sea Island Airport, Vancouver, completing a flight across Canada during which he visited all the Aero clubs en route. He made the final leg from Calgary in eight hours, flying the Moth plane presented to Major-General J. H. MacBrien, president of the aviation league, several years ago. It is the Moth's fourth visit to Vancouver and its fourteenth trans-Canada flight. It has done some 86,000 miles.

Mr. Ross finds more flying is being done in nearly every city. "Few Canadians are going to the United States for aviation training," he said. "In some parts of the east, in fact, the trend is the other way."

### Railroad Station Nursery

Newest Innovation Established In France Will Be Free

A nursery is the latest innovation to be installed at the Montparnasse Railway Station in Paris which serves Brittany and La Vendee. From 40 to 50 babies may be cared for in this railroad nursery, the first to be established in France, which will shortly be imitated in the principal stations of the State Railways. If baby wants a bath, a change of clothing, a bottle of milk, an hour or two of sleep, all this will be available at the nurseries, and all of it will be free.

It has been discovered that bees communicate by performing a kind of dance. Those with whom they communicate generally do the same.

## Soured ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and generally unwell make the mistake of taking salts, oil, mineral water, laxative candy or shaving cream, or rouge which only more so. What you need is to wake up your liver bile. Start your liver pouring the daily flow of liquid bile into your bowels. Get your stomach and intestinal working as they should, once more. Your Little Liver Pills will soon fix you up. Fully vegetable. Safe. Sure. Quick. Ask for Little Liver Pills. Reduce salivary secretions at all druggists.

### Cars Are Practically

Immune To Lightning

Safest Place For Motorists If Storm Overtakes Them

If you are driving along the highway when an electrical storm comes up, and you seek a nice safe place to stay until the storm passes, just take the advice of experts, and stick right to the driver's seat.

The Bureau of Standards tells us that automobiles are practically immune to lightning despite the fact that rubber tires and the car as a whole become very wet during the storm.

Persons driving within a conducting enclosure are fairly safe against lightning, and the auto body, although enclosed to a considerable extent by glass, approaches this condition.

The average motorist is probably safer in his car during an electrical storm than in his home. Come to think about it, there are mighty few cases on record of autos being struck by lightning. And this is rather remarkable when you stop to consider the hundreds of thousands of cars out in electric storms, particularly in our larger cities.

### Society Doing Good Work

Entomological Society Of London Meeting With Outstanding Success

More than 150 delegates, representing 22 countries, will assemble in London for the three-days centenary celebrations of the Entomological Society of London, England.

Economic entomologists in every country of the Empire are now fellows of the society, and in proof of the value of their work two outstanding successes may be instanced—the recent reclamation of three million acres of land in Queensland from the prickly pear, and the rescue of the entire cocoanut industry of the Fiji Islands from a little purple moth which had damaged the trees beyond bearing.

In each case success was achieved by the introduction of a parasitic insect. The world's hope of controlling the migratory locust in Africa and Asia is also dependent on the economic entomologist.

Wonderful Trip For English Schoolboys

Have Left Manchester On Holiday Trip To Morocco

Twelve pupils at the Manchester grammar school, who have left for a holiday trip to Morocco, will be the first Europeans to inspect the hitherto forbidden city of Tchenzer. Permission has been granted to them on account of the school's friendly relations during previous trips with the Sultan and high officials.

In addition to exploring many little known parts of Morocco, the boys will also act as ambassadors for the Lancashire cotton trade. They are taking with them samples of Lancashire cloth, in order to impress the people of Morocco with its quality. As a result of doing this on previous visits many of the Moroccan hotels have purchased large quantities of such Lancashire goods as tablecloths and bed sheets.

### Boom In Construction

Twenty-Six Cities Plan Building Projects Which Will Total \$100,000,000

Twenty-six cities in Canada expect shortly to undertake engineering and building projects amounting to \$100,000,000, according to a survey made by the national construction council. In all, questionnaires were sent to 54 centres, and it is expected the final figures will reach \$350,000,000.

Twelve local committees are to be appointed at strategic points in Canada, to be formed along similar lines to the national construction council, in order to carry out survey and research work in the various provinces for the national body.

### Best Container For Cream

A well soldered plain-bottomed tin can, about eight inches in diameter and 30 inches deep has been found by dairy farmers to be the best kind of vessel in which to hold cream. It is easily cleaned and convenient to handle. If cream is held in earthenware crocks that have in any way become chipped, an undesirable flavor may be imparted to the butter.

### Had New Experience

Canada's Governor-General has met with a new experience. He attended his first baby clinic. Doctors examined 25 lusty youngsters while Lord and Lady Bessborough looked on. The clinic was part of the program staged for their Excellencies as they visited Digby on their Nova Scotia tour.

## The Inside Story!

Right inside your pipe bowl . . . there's where OGDEN'S Cut Plug tells the story of smoking pleasure and it's a serial story, too—every pipeful is a chapter of enjoyment . . . complete in itself . . . told in a language you'll always understand. The more particular you are about pipe tobacco the more you'll like OGDEN'S Cut Plug. You can't help but like it . . . it packs right . . . lights right . . . burns right . . . in your pipe!

## OGDEN'S CUT PLUG

If you "roll your own," use OGDEN'S fine cut cigarette tobacco and Chantecler cigarette papers

### Germans Accept Nazi Salute

Polite Greeting Is Very Similar To Fascist Gesture

The Nazi Fascist salute, with the right arm uplifted, is slowly but surely taking hold among the German masses.

While it has not yet replaced the handshake or hat-lifting as thoroughly as has the "Roman salute" in Fascist Italy, it is becoming more and more generally accepted as a polite form of greeting.

The Hitler salute, as at present practiced by non-Nazi civilians, still lacks the snap and sweep of the Mussolinian gesture.

The Italians shoot the right hand, palm outward, well above the head, hold it there for a brief dramatic second, then drop it sharply.

In Germany, however, most of the salubers are content to bring the right forearm up from the elbow to the level of the head and then lower it slowly.

### Woman Wins Fellowship

Graduate Of Toronto University To Conduct Research In England

A Royal Society of Canada fellowship to be held at Newham College and the Botany School, Cambridge, has been awarded to Dr. Dorothy F. Forward, a graduate in Arts of the University of Toronto, who holds also the post-graduate degree of M.A. and Ph.D. The work for which she was awarded this fellowship is concerned with the physiological resistance of wheat plants to attacks of rust. During her post-graduate studies in the department of botany she held a fellowship of the Ontario Research foundation. Dr. Forward expects to proceed to England this summer.

### CHAPTER XIII.—Continued.

As he went out along the slope toward the post, he was realizing, with bitterness of heart, that his sacrifice eighteen months ago, the greatest sacrifice a man can be called upon to make, had been worse than futile. It had cost him dearly, it had brought pain to Joyce, it had brought them tonight to their hour of separation. And yet, through his bitter mood ran the knowledge that in his sacrifice he had set all personal desires aside and had kept faith with a partner dead and had held sacred his promise to Curt Spaulding, until Elizabeth herself had made that promise impossible of fulfillment.

Again he lived over that hour when he came upon a trapper's deserted, snow-drifted hut, and found Curt there, stricken with the disease, with both lungs frozen, deserted by his treacherous Indian helper, dying as valiantly as he had lived. He felt that no man on earth could understand the emotion that racked him as he knelt beside the bunk, whispering to a partner who was going down into the dark, leaving a sister penniless, alone in the savage North.

"Alan, she loves you," he could hear those broken whispers that presently were stifled. "If you'd marry her—my sister, Alan—I would, mind—going—if I could think of you—partner and brother, too—"

And over and over again that dying whispered plea, and the ineffable peace that came when Alan made covenant. "I will, I will, Curt. I love her, too, because she's your sister."

And now, as he thought of that lone funeral sled trip home, and as he glanced up the slope toward Curt's towering lobstick, his lips fashioned silently:

"I tried, Curt. You wouldn't have asked more of me than what I did. But it couldn't be, it couldn't be."

Joyce had helped Bill take her personal baggage down to the wharf, and had talked over with him final arrangements about forwarding the peltry to Edmonton and selling the trading store. Waiting for the steamer she had quietly stepped out of Mrs. Drummond's house into the garden back of it, telling no one where she had gone.

She was aware that Alan intended to come down before she left, for half an hour with her. She had slipped out in the garden to make that impossible. If he came down to the wharf at the last moment, she felt she could say good-bye calmly enough, with a brief handclasp a voyageur's nod and bon chance; but a longer time with him would be unbearable.

As she stood there, half-hidden by an arbor of morning glories, she saw a dim figure come out along the slope

from the direction of the woods edge, and as it passed her, scarcely a dozen feet away, she recognized Alan. He went on to the factor's house. She heard him knock, heard him ask for her, heard his puzzled "That's odd," when Mrs. Drummond said she'd been gone for half an hour.

By a lightning flash Joyce saw him as he started on past her. Something in his manner, in his dejected head, in his slow beaten gait, let her know he was aware she deliberately had gone away in these last minutes and deliberately had shunned a parting talk with him.

As Alan went slowly past the garden, unconscious of the lightning flashes, thinking only that Joyce, who had burned his picture and his gift, was now refusing a last hour with him, he heard a voice in the wintry blackness. "It sounded like his name. In surprise he whirled toward the arbor of morning glories, and as he stood there, listening, he heard it again—his name—Joyce's voice, half-sobbing:

"Alan! Don't—don't go. . . . I'm—I'm here. . . ."

### CHAPTER XIV. The North's Call

As she worked on a report that evening in the little library nook, Joyce would have sworn that there and listen to the voice of the dark eyes peering into the blackness outside the window.

It was time for Alan to be returning with Bill and Ped from a patrol down the Mackenzie. In the sharp vigorous gusts of October wind she kept thinking she heard the drone of the launch. Across the room from her, on a blanket-padded couch, little Marion Montgomery had fallen asleep over a picture book, her tiny moccasins off, one arm hanging over the couch. In the deep dreamless sleep of babyhood the little tot was oblivious of the threat and snarl of autumnal wind swirling around the cabin. If there was any sacrifice in having that tiny little companion in her home, Joyce had not yet become aware of it. The report she was working on was a statement to her former bureau chief in Ottawa of the money expended in her work among the Indian women around Endurance.

During a lull in the wind she suddenly heard the unmistakable sound of the big police boat skimming up the wave-tossed Mackenzie. Peeling aside her report, Joyce ceased being Deputy Indian Agent at Fort Endurance, N. W. T., and became the wife of Inspector Baker, officer commanding there. With a glance at the sleeping tot she flung a cape about her shoulders and went out the cabin and ran down the dark winding terrace toward the wharf.

When the yellow eye of the launch drew near, Joyce saw a tall figure step upon the prow half-deck and stand ready with the painter chain. When he jumped out upon the planking, jerked the launch alongside and lapped the painter around a pier-head, he turned to her, hat in hand, reproaching her.

"Girl, girl, you shouldn't have come down here in this raw wet wind. You've got to begin learning to be careful."

Pedernault snapped off the launch scudlight; and as the two men began gathering their packs together, in the mantling darkness Joyce silenced Alan's reproach, rising on tiptoe, oblivious of his wet slicker and the cold steel of his gun buckle.

After supper, when Alan had made himself regimental again after the six-days hard patrol, he stepped out into the living room where Joyce was finishing her report.

She beckoned him over to her, holding out several letters which had come for him on the Chilpewyan mail. She had not opened them; but now when he brought a chair beside her, she read them with him.

Buzzard had dashed off a page from his apartment address in Winnipeg. He had "dunked" a couple dozen fairs and pumpkin shows in his new DeHavilland, but had found that line too tame. Right now he was flying the Winnipeg-Edmonton lap of the Air Mail. Next spring he was going to boss the "smoke hawk" division of the Manitoba Fire Prevention, with a circus of ten scouting planes under him.

"Some time this winter (he past-scripted), we might put skis on the crate and hop down north to visit you. But Alan, you find out first if Joyce holds anything against me for telling you she burned that rainbow scarf. I don't think she ever has forgiven me."

Joyce looked up, laughing, but with a catch in her voice as she remembered that haunting day. "Did you notice the 'we,' Alan? He puts it into a postscript! She's just a mere afterthought! Who is she?"

"Louise of Kamloops, is all I know," Alan answered.

### The next envelope was an enigma.

It contained no message, no writing—nothing but two pictures. One was a panorama of a large country estate, with lawns, servant quarters, gardens, orchards. The other showed an imposing town residence, a stucco building overhung by ivy, with a limousine waiting in the doorway.

Bewildered, Alan looked at the pictures twice, searched in the envelope for a possible note, glanced again at the address. And then, as he studied the crest of the envelope, he started a little. This was from Elizabeth! That insignia was the Lamroth-Haskell crest! Since Haskell married her, and they left the North, they had written to one on at Endurance; but Alan had heard that Haskell, transferred to a small detachment in the Kootenay coal fields, had resigned and gone east.

Suddenly understanding the pictures, Alan looked up at Mrs. Joyce's eyes, and he saw that she too understood. "In a kind of scorn she remarked:

"That's like Elizabeth, isn't it, Alan? She wants you to realize she's got a country estate and town house and uniformed chauffeur and all the things that—that—"

"Say it?" Alan bade. "All the things I'd never been able to give her, she's trying to rub it in. Yes, it's like her, Joyce."

"Sometimes I pity her a little—with him, Alan."

"I wouldn't say that, Joyce. I knew her better than you did. Did I say, God pity him—with her."

With a gesture of finality he flipped the pictures contemptuously into the fireplace.

Later, when the lights of the post were out, when the fire logs had burned to red coals and Joyce had carried her sleepy little charge away to bed, they went outside the cabin. In the night sky they heard the honking of Arctic geese, last of the migrants, winging swiftly south; and they had the feeling that in the illimitable woods all furry creatures were seeking out warm dens and storing food for the Frozen Moons. Up and down the wilderness rivers and fardung over the Strong-Woods, a whisper had gone abroad of a mighty change brooding—a whisper that drove less courageous things into fledgling flight, yet was but a challenge to those more valiant of heart.

The spirit of winter was in the air tonight; and Alan and Joyce were welcoming it. Here in the far North they had lived through other winters; they knew the savagery of those Moons and their white silent beauty, too. They had worked to keep them bused during the long Dark, and a home against the blind swirling blizzards, and the vista of a life together here in this far land of their choosing.

[THE END.]

Because the force of gravity diminishes as a man rises above the surface of the earth, an engineer in Austria has invented a device for measuring the force to tell an aviator his altitude.

The person who goes through the year without illness is exceptional, for statistics ascribe 8850 cases of illness to each 1,000 persons in the United States each year.

Artificial sunshine has lowered the death rate in the London zoo.

## WEAK WOMEN

Take Lydia E. Pinkham's

Vegetable Compound. Have you ever felt that you were too weak to do anything . . . that you did not have the strength to do your work? . . . that you were weak and run-down? . . . that you should take a tonic such as Lydia E. Pinkham's Vegetable Compound. Headaches and backaches that are the result of a tired, run-down condition often yield to this marvelous medicine. 98 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your drugist today . . . and watch the results.

## Rails Used As Medium

Conductor Can Converse With Other Trainmen Ahead Or Behind

The conductor in the caboose of a long freight train can now carry on a conversation with the engineer in the locomotive cab, or he can converse with those in charge of trains immediately ahead or behind his train on the same track by means of a new type of communication system developed by engineers of the General Electric Company.

"This new means of communication is not radio, carrier current or direct telephone in principle," says an announcement by the company. "Earphones are not required; with five watts or less put into the inductor coils, loud-speaker reception of ample volume to overcome train noises is received over a rail distance of five miles or more."

"The rails are used as the medium for the transmission and pick-up of signals, which are put into and taken out of the rails by inductor coils suspended from the caboose and locomotive at minimum clearance distance above the rails. These inductor coils are directly connected to the transmitting and receiving equipments."

## Lesson For Canadian Soldiers

Learned Necessity Of "Mopping Up" At Battle Of Givenchy

The battle of Givenchy, when Canadians displayed great heroism by bringing up to the front lines two pieces of field artillery, was recalled at Montreal by Sir Arthur Currie, who commanded the second Canadian brigade on that occasion. When an attacking party penetrated as far as the third enemy trench it was taken from behind by a party of the enemy who had concealed themselves in dugouts in the first trenches and had been overlooked, a fact which proved fatal to the first battalion, which was caught between two fires. It was in this battle that the Canadians learned the necessity of "mopping up," Sir Arthur, now principal of McGill University, said.

The two guns brought up into the front line did considerable damage before being disabled. Twenty of the 23 officers participating in the attack were killed.

On occasion of Sir Arthur's remarks was the anniversary of the battle.

## Youth Seen In Attempt To Adjust

Edna Robb Webster

Stirred by modern youth's desperate efforts to adjust itself to the complicated demands made by life and a rapidly changing world, Edna Robb Webster, noted serial story writer, has given her attention to the problem in her latest book, "Occasional Wife," a romance of modern marriage. The story begins in this paper at an early date.

Mrs. Webster takes as her two chief characters, Camilla Hoyt, adopted daughter of a wealthy family, and Peter Anson, poor and struggling artist. They love each other an want to marry. Camilla, whose foster mother, wants her to marry for money, is not to share in her family's wealth when she comes of age, but she is trying to carve out a career for herself as a commercial artist. To marry Pete and saddle him with the responsibility of her support and happiness would mean, so Camilla thinks, the sacrifice of his already promising career. So she evolves a unique marriage plan.

Mrs. Webster's serial stories are known wherever newspapers are printed. She has written many favorites, among them "Dad's Girl," "Joretta," and "Lipstick Girl."

## Have Universal Appetite

Some Beetles Eat Anything From Poisonous Drugs To Chocolate

The cigarette beetle which bores holes in cigarettes and prefers tobacco to other kinds of products nevertheless feasts on cayenne pepper, ginger rhubarb, rice, figs, yeast cakes and prepared fish food. The London Entomological Branch is on the outlook to prevent its spread in Canada. Another beetle with a universal appetite is the drug store beetle, which makes no discrimination between poisonous or harmless drugs, its preference being for the deadly aconite and belladonna. It also bores holes in leather and books as a sideline, attacks dried beans and peas, breakfast foods, flour, syrup, bread and chocolate, has a weakness for parsley seasoning, pepper and ginger, and is said to tackle everything except cast iron. It is also under surveillance.

## Determined To See Fair

Nineteen-Year-Old Toronto Boy Rode Bicycle To Chicago

When the desire to view the wonders of Chicago's Century of Progress Exposition came to Roy Gurey, 19, of Toronto, he didn't ponder ways of raising transportation fare. Instead, he mounted his bicycle and pedaled to the Illinois city in four days of arduous grinding. When Roy arrived he shook the kinks out of his legs by parading in and out of the exposition buildings, viewing the sights of the Midway. Overnight he stayed at a Boy Scout Club.

## Green Feeds For Poultry

In vitamin and mineral content alfalfa and clover show themselves to be the most satisfactory green feeds for poultry. Fresh or dry, these legumes are palatable and nutritious, the leaves of the alfalfa or clover being well suited for use as an efficient form of feed. Alfalfa meal or better still alfalfa leaf meal from well cured plants is also a suitable kind of green feed mixed in the mash—Dominion Poultry Husbandman.

A Brooklyn bakery is using radio wave heat to bake crustless bread.

## Little Helps For This Week

"Giving thanks always for all things unto God"—Ephesians 5:20.

For blessings of the fruitful season, For work and rest, for friends and home, For the great gifts of thought and reason, To praise and bless Thee, Lord we come.

Yes, and for weeping and for waiting, For bitter hail and blighting frost, For high hopes on the low earth trailing, For sweet joys missed, for pure aims crossed.

Notwithstanding all that I have suffered, all the pain and weariness and anxiety, and all the sorrows that necessarily enter into life, and the inward errands that are worse than all, I would end my record with a devout thanksgiving to the great Author of my being. I am unwilling to make my gratitude to Him "a thanksgiving of mercies," but instead I would have it to be gratitude for all that belongs to life and being, for joy and sorrow, for health and sickness, for success and disappointment, for life and death; because I believe that all is meant for good.—Orville Dewey.

Italy's new highway for trucks exclusively has a great number of tunnels.

## There is Safety in Numbers

THERE'S nothing that you should be surer of than the food for yourself and your family, for when bacterial action starts in food, it's a menace to health. The way to be sure that food is preserved safely is to pay attention to Numbers.

SCIENTISTS say that food is preserved safely and freshly at a temperature of 50 degrees. That's a number to remember. Put a thermometer in your food chamber, and if the temperature goes higher than 50 degrees, beware of tainted food.

THAT'S why Electric Refrigeration is becoming more and more popular, as the Thermostat safeguards your food by constantly keeping the temperature below the danger line. It provides constant cold, at a surprisingly low cost. See the Electric Refrigerator model exactly suited to your home at your Dealer's Showrooms today.
